A surprising 48.5% capital increase

Seasonally weaker 4Q20 net profit

SSP's 4Q20 core net profit (NP) was THB127m, down 5% y-y and 38% q-q, missing our estimate by 12% and Bloomberg consensus by 15%. The NP decrease was due to the seasonally lower production levels of solar farms that were partly offset by the capacity growth from its new project, the Yamaga solar farm in Japan. 4Q20 revenue from solar farms in Japan jumped to THB176m (+175% y-y, -19% q-q), while the revenue from the 16MW solar farm in Mongolia rose to THB25m (+9% q-q). Revenue from its other solar farms declined in 4Q20, including the 50MW solar farm in Vietnam (-56% q-q) and the solar farms in Thailand (-13% q-q). Including an unrealised FX gain of THB14.7m and other non-recurring expenses, 4Q20 NP was THB133m, up 13% y-y but down 42% q-q.

A mixed bag of revenue growth

SSP's 4Q20 revenue rose y-y to THB434m (+19% y-y, -20% q-q), driven by y-y higher electricity sales from Japan and Mongolia to offset the y-y weaker revenues from Thailand and Vietnam. SSP saw its 4Q20 depreciation and amortisation rise y-y to THB125m (+36% y-y, -19% q-q) due to the change in accounting. 4Q20 financing costs rose to THB79m (+46% y-y, +6% q-q) due to the long-term loan drawdown from both Thai and Japanese financial institutions for new project investments, as well as the rising financial costs of projects under construction in Japan.

Capital increase to fund new growth projects

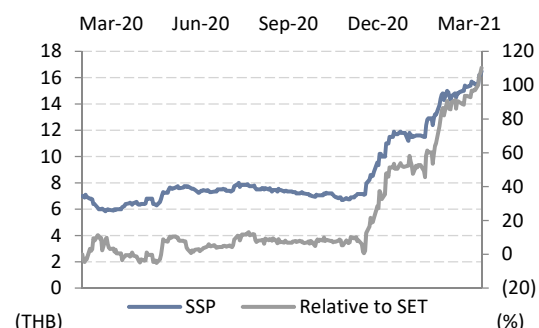

SSP announced a 48.5% capital increase from THB922m to THB1,369.17m, adding THB447.17m in new registered capital for 1) +10% for a stock dividend of 92.2m shares at a THB1 par value on 10 existing shares to one new dividend share (10:1), implying a THB0.1/share dividend value; 2) +11% for the 8-month SSP warrant 1 (SSP-W1) – 101.42m warrants at a 10:1 ratio with an issuance date on 22 Jun-21 and an exercise price of THB12; and 3) +27.5% for the 47-month SSP warrant 2 (SSP-W2) – 253.55m warrants at a 4:1 ratio with an issuance date on 22 Jun-21 and an exercise price of THB18-24.

Ready to grow

We maintain BUY and our SoTP-based TP of THB16. We are positive on SSP's capital increase and believe its NP growth will continue in 2021-22, driven by new growth projects which should be the key earnings drivers for the company in the same period, supported by its capital increase.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
